### **DETAILED ACTION**

Prosecution on the merits of this application is reopened on claim 1 which is considered unpatentable for the reasons indicated below:

The examiner inadvertently rejected the instant claim 1 with an Obvious Double Patenting type rejection when it should have been a Statutory Double Patenting type rejection because the scope of the claim is the same and not obvious. The Examiner apologizes for any inconvenience this may have caused.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 7329501. This is a double patenting rejection. The instant claim 1 and the patented claim 1 are drawn to an isolated biopolymer consisting of SEQ ID NO:1.

### ***Conclusion***

No claim is allowed.
